FGP

World class design. Global esprit.

The FGP collection of site furniture and LED lighting from Milan-based designer Francisco Gomez Paz combines high design for international applications with regional customization using locally sourced woods. The five elements in the cast aluminum collection share a fluid simplicity that is visually elegant and light.

The FGP Bench

The subtle concave curves of structural frames give the bench a soft appearance, making it a welcoming meeting place in the park or on the street.

The FGP LED Pedestrian and Path Lights are shaped by three stems that rise from the connection with the pole, forming a gently curved head. Both lights hold LEDs in triangular arrays that cast illumination between the stems in a clean circular footprint. The path light assists in wayfinding. The pedestrian light provides vertical illumination, making it possible to combine integrated FGP elements to create consistently beautiful public spaces that are usable 24 hours a day.

The FGP Litter and Bike Rack

The FGP litter echoes the bench's organic shapes in its frame and linear wood slats on its sides. The FGP bike rack has an expressive form that cleverly traces the outline of a bicycle frame. The rack is affixed to the ground at a single point, making it easy to install. Like all elements in the FGP collection, parts come together in carefully articulated connections with minimized or hidden fasteners. And like the bench and litter, the cast aluminum bike frame has a handsome and durable silver/grey anodized finish.
